Define the
Problem Statements

Date	16 October 2022
Team ID	PNT2022TMID31563
Project Name	Web Phishing Detection
Maximum Marks	2 Marks

Customer Problem Statement Template:

As online transactions grew in popularity, cybercrimes also grew quickly. Because of the anonymity offered by the internet, hackers try to trick users by using techniques like phishing, SQL injection, malware, man-in-the-middle attacks, domain name system tunnelling, ransomware, web trojans, and other forms of attack. Phishing is said to be the most misleading of all of these tactics.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
------------------------	-----------------	---------------	-----	---------	---------------------

PS-1	Student	Opens an	Gets Hacked	It was a Fake	Insecure
		compromised		website	
		link and			
		enters the			
		credentials			
PS-2	Shopkeeper	Opens a link	His bank	The link was	untrustworthy
		from a bank	account	fake and the	
		and enters	details and	hacker aims for	
		the account	credit card	the money	
		details	details gets	the account.	
PS-3	Homemaker	make	Ended up as	The website	disappointed
		transactions for the purchased items from checkouts	she purchases from an fake website	had an advertisement for discounts.	
PS-4	Employer	complete the	Found an file	the file seemed	annoyed &
		tasks by the end of the day	through mail and opens it, and his company details gets hacked	to be phishing and fake one	disturbed
